ZIDDI KRUNCH

India's First Savory, High-Protein Chip
A Strategic Category Expansion
Proposal for MuscleBlaze

Shubham Bhardwaj

EXECUTIVE SUMMARY

- India's savory snacks market is growing steadily, driven by high consumption frequency and deep cultural relevance.
- However, the market remains polarized between unhealthy mass snacks and sweet-biased protein products, leaving a clear gap for healthy, savory, high-protein options.
- Consumers, especially fitness-conscious urban millennials are experiencing “sweet fatigue” from protein bars and cookies.
- This has created a significant white space for a product that delivers chip-like taste with genuine nutritional benefits.
- Muscle Blaze addresses this gap with baked, legume-based protein chips powered by proprietary Biozyme® technology, delivering high protein, clean ingredients, and familiar Indian flavors—without compromising on taste.
- By operating at the intersection of taste, health, and habit, Muscle Blaze is uniquely positioned to define and lead India's savory protein snack category.

Savory snacks market includes retail sales of processed snacks, potato chips, nuts & seeds, meat snacks, popcorn, and others. The market is valued according to retail selling price (RSP) and includes any applicable taxes.

- The Indian savory snacks market recorded revenues of \$4.3 Billion in 2024, representing a compound annual growth rate (CAGR) of 5.2% between 2019-24.
- The India Healthy Snacks Market was valued at USD 3.91 Billion in 2024 and is expected to reach USD 6.12 Billion by 2030 with a CAGR of 7.75% during the forecast period.
- The ‘Savory Gap’ Shift: For years, healthy meant **sweet** (protein bars, protein cookies, peanut butter). Consumers are now tired by sweet protein. The fastest-growing search volume is for **savory guilt-free options** (chips, bhujia alternatives, flavored nuts) with tastier flavours.

Consumers are moving from Lays to Makhana/Popped Chips. The wave is here.

- 73% of Indians now read ingredient labels before buying.
- 67% of consumers are actively seeking Guilt-free savory options like Makhana.
- 150 Million health-conscious Indians are the serviceable addressable market (SAM).

Market Size Comparison

- **The Opportunity:** The Indian Savory Snack market is valued at \$14 Billion (growing at 8% CAGR) till 2030, yet there is **zero dominant player** in the ‘High-Protein Savory’ segment.
- **The Problem:** Fitness enthusiasts suffer from **Sweet Fatigue** (too many bars/shakes). They crave savory snacks (Namkeen) but currently choose between Junk (Lays – Tasty but Unhealthy) or Diet Chips – Healthy but Tasteless.
- **The Solution:** Launch MuscleBlaze Biozyme Chips. A baked, 15g protein chip powered by our **Biozyme technology** for zero bloating.
- **Strategic Fit:** Shifts MB from a **Low Frequency** business (Whey: purchased 4x/year) to a **High Frequency** business (Chips: purchased 100x/year), significantly increasing Customer Lifetime Value (LTV).

THE CONSUMER DILEMMA: Taste vs Gains

The User Persona: Rohan, A Corporate Employee

Profile: 26 years old, works in IT and goes to the gym 4 days a week.

The Pain Point: At 5 PM (Office Break), his colleagues eat Samosas/Biscuits.

His Options:

Eat Nothing: Starve and ruin his metabolism.

Eat a Protein Bar: Chocolate flavour is repetitive and boring.

Eat 'Diet' Chips: Boring and traditional flavours.

The Ziddi Crunch Opportunity: Give Rohan a cheat code, a snack that tastes like a Samosa but fuels him like a shake.

INTRODUCING "MB BIOZYME CHIPS"

Core Value Proposition:

- **15g Protein Per Pack:** Equivalent to 2 eggs.
- **Powered by Biozyme™:** The only product in India clinically tested for 50% higher protein absorption and Zero Bloating. (This is our Moat).
- **Baked, Not Fried:** 60% less fat than potato chips.

Flavor Strategy (Indian Palate First):

- **Ziddi Masala:** (Blend of Indian Spices giving a homely feeling)
- **Cream & Onion:** (Mass appeal and mild in taste)
- **Peri-Peri Punch:** (For people wanting to have a spicy flavour)

90% of the Healthy Snacking market is sweet. The Savory aisle is empty.

The Competitive Landscape

Competitor Archetype	Key Player	Their Strength	Their Weakness	The MuscleBlaze Attack (Our Edge)
The Old School OG	RiteBite (Max Protein)	First-mover advantage; Mass distribution.	Hard texture, heavy digestion branding.	Biozyme Technology Clinically tested for 50% higher absorption & zero bloat. Lighter, popped texture.
The Clean Purist	The Whole Truth	No Added Sugar; Clean ingredients.	Portfolio is 90% sweet (bars/chocolates). Ignored the Indian savory craving.	Savory Mastery Indian-centric 'Chatpata' flavors (Masala, Peri-Peri) to break the sweetness monotony.
The Diet Snacker	Too Yumm!	Baked not Fried and mass appeal.	Low calorie, but low protein. It's a 'diet' snack, not a 'protein' snack.	High Protein Density Real Fuel. 1 Pack = Protein of 2 Eggs (not just empty low-cal filler)
The Natural Premium	Farmley / Open Secret	Maida-free; Nut-based healthy ingredients.	Focus on ingredients, not hitting specific macro targets for athletes.	Forensic Transparency Pharma-grade authentication. Lab-tested protein accuracy users can verify.

Our 3-Pillar ‘Moat’ Strategy:

1. Scientific Superiority :
- Problem: High protein snacks usually **cause gas/bloating.**
 - Solution: Novel Biozyme technology ensures our snacks are **Bloat-Free.** We aren't just selling chips, we are selling digestive comfort.
2. Palate Superiority (Savory Shift):
- Problem: Fitness enthusiasts suffer from **Sweet Fatigue** (Whey/Bars are all sweet).
 - Solution: We own the Savory/Salty occasion. The only snack with the **taste of junk food** (Lays/Doritos) but the **macros of a supplement.**
3. Trust Superiority (Forensic Transparency):
- Problem: ‘Fake Healthy’ labels **hiding palm oil/maltitol.**
 - Solution: Bringing **Pharma-grade trust** to the snack aisle with batch-specific authentication codes.

Product
Roadmap

Business
Viability

Launch & Digital Domination: (Targeting, Positioning, and Digital-First Rollout for 'Ziddi Crunch')

TARGET AUDIENCE & PERSONAS

- High-performance professionals needing 24/7 fuel (moves beyond the 1-hour post-workout window).
- Existing whey users tired of bars/peanut butter, craving something savory.
- Corporate employees seeking guilt free alternatives during office breaks.
- Insight : Most of protein snacks are sweet, but the Indian palate is savory. Users want Chatpata flavour without the guilt.

CORE POSITIONING

- Concept : Tastes like junk food, fuels like a supplement.
- Primary USP: The Gut-Friendly snack(Powered by Biozyme™ for zero bloating).
- Differentiation: Forensic Transparency (Lab certified) vs. Fake Healthy snacks with hidden sugars/palm oil.
- Slogan: "Don't Cheat on Your Diet. Cheat on Your Cravings."

DIGITAL DISTRIBUTION

Direct-to-Consumer(D2C):

- Launch on MB App/Website to reward loyalists first.
- Slip free sample packs into every Whey Protein tub sold (Zero CAC trial).

Quick Commerce:

- Exclusive partnership with Blinkit / Zepto.
- Target the 4 PM – 7 PM & 11 PM (Late Night Munchies) slots.

Launch Goal: Achieve 50,000 trials in first 90 days via sampling with <₹10 CAC.

(GTM)

Product
Roadmap

Business
Viability

Scaling & Offline Expansion: (Pricing, Offline Activation, and 12-Month Execution Roadmap)

OFFLINE ACTIVATION

Gym Vending Machines :

- Replace general snacks in partner gyms with MB Booths.

Corporate Offices :

- Set up Vending Machine in IT Parks, Office Complexes offering healthy offering to employees.

Modern Trade:

- Entry into premium grocery chains (Nature's Basket, Spencers) once online sales volume is proven.

PRICING & UNIT ECONOMICS

- Low Ticket / High Velocity : Shift from selling ₹5,000 Tubs (Low Freq) to ₹50 Packets (High Freq: 2-3x/week).
- Subscription Model: 30 packs delivered monthly via MB App for recurring revenue.
- Cross-Sell Strategy : Use the ₹50 chip as an acquisition tool to upsell high-margin Whey Protein later.

12-MONTH LAUNCH ROADMAP

- Months 1-3 : R&D focus on Biozyme survival. Finalize 'Ziddi Masala' flavor.
- Months 4-6 : Secure contract manufacturing (Asset-light).
- Months 7-9 : Digital Launch on Blinkit/Zepto.
- Months 10-12 : Offline retail entry & Subscription launch.

Strategic Goal: Convert 15% of existing Whey customers into weekly Snack subscribers within Year 1

Phase 1: "The Lab" (Months 1–3)	Phase 2: "The Setup" (Months 4–6)	Phase 3: "The Attack" (Months 7–9)	Phase 4: "The Invasion" (Months 10–12)
Focus: R&D & Formulation	Focus: Supply Chain & Beta Testing	Focus: Digital Launch (D2C & Q-Comm)	Focus: Offline Scale & Recurring Rev.
• Technical Challenge: Solving "Cardboard Taste." Benchmarking texture against Lays (crunch) and Too Yumm (airiness) to eliminate density. • Biozyme Integration: Developing "Post-Bake Dusting." Probiotics are sprayed <i>after</i> cooking to prevent heat damage, validating "Gut-Friendly" claims. • Flavor Locking: Finalizing 3 "Indian Hero" flavors: Ziddi Masala, Cream & Onion, Peri-Peri.	• Asset-Light Mfg: Securing OEM partner for "Popping Technology" (not frying) to keep CapEx low. • Trust Implementation: Deploying Quality Officers to implement MB’s "Authentication Code" system on every pack (Industry First). • The "Gym Bag" Beta: 10k units slipped as "Surprise Gifts" in Whey orders. QR codes collect "Rate the Crunch" feedback before launch.	• Exclusive Drop: Launching on MB App/Website first to reward loyalists. • The 10-Minute Partnership: Aggressive Q-Commerce entry (Blinkit/Zepto). Buying "Checkout Slots" (e.g., nudging users buying eggs/bread) for impulse wins. • Low-Risk Trial: Launching a "Discovery Box" (mixed flavors) at ₹99 entry price to force sampling.	• Vending Machine : Replacing dusty gym machines with "MB Ziddi Stations" (Savory Chips + Cold RTD Protein Water). • Modern Trade: Expansion into premium grocery (e.g., Nature's Basket). • Subscription Model: Activating "Snack Box Subscriptions" (30 packs/month) on MB App for office goers.

The Product Pipeline: What We Are Building

- Savory High-Protein Chips: Popped/Baked crisps (Soy/Pea base) positioned as the definitive **Namkeen replacement**.
- Trail Mixes: Pre-portioned (30g) roasted nuts/seeds, marketed as healthy snacks (10g protein).
- RTD Clear Protein Water: Sparkling, zero-sugar, fruit-flavored whey **isolate drinks for summer refreshment**.
- Soft-Baked Protein Cookies: Chewy texture to replace the hard/dry cookies currently on the market.

Success Metrics: How We Measure Victory

- Retention Rate : Target **30% Repeat Purchase Rate** within 60 days. (In snacking, if they don't buy it twice, it's a failure).
- Conversion Rate : Target **15% Attach Rate**. (15% of Whey customers must add a pack of chips to their cart).
- Quick Commerce Win: Become a **Top 3 Healthy Snack** on Q-Comm platform within 6 months.

Unit Economics: The "Per Pack" Profitability (Basis: 30g Pack)

Line Item	Amount (₹)	% of NRV	Strategic Notes
MRP (Shelf Price)	₹ 50.00	-	<i>The No-Brainer Impulse Price Point.</i>
(-) Channel Margins & Tax	₹ 15.00	-	<i>GST (12%) + Retailer/Distributor Margins (~25%).</i>
(=) Net Realized Value (NRV)	₹ 35.00	100%	<i>Revenue recognized by MuscleBlaze.</i>
(-) COGS (Ingredients + Mfg)	₹ 14.00	40%	<i>Whey Isolate, Biozyme Dusting, Manufacturing.</i>
(=) Gross Margin	₹ 21.00	60%	<i>Healthy margin protected by Asset-Light OEM model.</i>
(-) Logistics & Packaging	₹ 5.00	14%	<i>3-Layer Matte Foil (Premium Feel) + Bulk Shipping.</i>
(=) Contribution Margin 1	₹ 16.00	46%	<i>Profit before Marketing spend.</i>
(-) Marketing / CAC	₹ 8.00	23%	<i>Higher % allocated to sampling & influencer seeding.</i>
(=) Net Contribution Margin	₹ 8.00	23%	<i>Sustainable profit per unit at scale.</i>
